MID SEMESTER EXAMINATION MARCH- 2025

Name of The Program: **B.Tech (Petroleum Engineering)**
Name of The Course: **Petroleum Production Engineering-II**

Semester: **VI**
Course Code: **TPE-605**

Time: 90 Minutes

Maximum Marks: 50

Note:

- (i) Answer All questions by choosing any one of the sub questions
- (ii) Each Questions Carries 10 Marks

Q1. (10 Marks)
(CO1,2)

- a) Describe what are different safety and water disposal systems in production facilities.

OR

- b) With the help of a flowchart write types of loads on offshore structure & describe Wave & Current load, Ice load & mud load.

Q2. (10 Marks)
(CO2)

- a) In deep water with depth of 510m in offshore, which platform should be used, describe that platform and give reason for your answer

OR

- b) What is well activation and explain the concept of Nitrogen used for well activation?

Q3. (10 Marks)
(CO2)

- a) Describe subsea production system, Field Architecture and subsea wellheads.

OR

- b) Define oil platforms? Name the different types of fixed and floating platform.

Q4. (10 Marks)
(CO1,2)

- a) Write a short note on ship shaped vessel & tension leg platform

OR

- b) Describe what are the safety systems used in production facilities.

Q5 (10 Marks)
(CO1, 2)

- a) Explain subsea production system and write all the equipment's used for Subsea production

OR

- b) How oil is stored and transported in offshore facility?
