

Mid-Term Semester Examination 2024

Paper set: 1

Name of the program: **B. Tech**

Name of the course: **Animal Biotechnology**

Semester: **6th**

Course code: **TBT 601**

Time: 1.5hrs

Maximum Marks: 50

- Q. 1: a) Highlight the history and scope of animal biotechnology (CO-1)
OR
b) Define basics of cell culture techniques and their applications
- Q. 2: a) Sketch out method for the preservation and maintenance of cell lines (CO-1)
OR
b) Examine effects of serum on culture media and freezing media
- Q. 3: a) Explain different transgenic methodology and their applications (CO-2)
OR
b) Analyze role of different retroviral vectors on trans-genetics
- Q. 4: a) Implement the principle of embryonic stem cells for genetic disorders (CO-2)
OR
b) Categorize transgenic techniques used for livestock biotechnology
- Q. 5: a) Explain differences between usage of serum free media and serum based media (CO-3)
OR
b) Sketch-out methods for the transport of ovum and sperm cells
