

### Odd End Semester Examination 2024

Name of the Program: **B.Tech. Biotechnology**  
 Name of the Course: **IPR, Biosafety & Bioethics**  
 Time: **3 hours**

Semester: **VIIth**  
 Course Code: **TBT701**  
 Maximum Marks: **100**

**Note:**

- i. Answer by choosing *any two of the sub questions*.
- ii. Each question carries 10 marks

|           |                                                                                                                                                                                                                                                 |           |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q1</b> | (20marks)                                                                                                                                                                                                                                       |           |
| (a)       | Differentiate between Business ethics & Bioethics with examples.                                                                                                                                                                                | CO4 & CO3 |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (b)       | Explain the hazardous characteristics of the biorisk agent.                                                                                                                                                                                     |           |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (c)       | Discuss the approaches for accessing the risk involved during any accidental exposure to a bioagent.                                                                                                                                            |           |
| <b>Q2</b> | (20marks)                                                                                                                                                                                                                                       |           |
| (a)       | Describe the elements of the biosecurity program. What are the effective measures that should be taken for transporting any infectious substance.                                                                                               | CO4 & CO5 |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (b)       | <i>"A science-based approach to managing pests that uses a combination of techniques to prevent or reduce pest damage"</i> . Comment on the aforementioned statement and support your answer with relevant strategies for reducing pest damage. |           |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (c)       | Explain the principles of ethical biotechnology. What are those social ethical concerns that underline the methods used for disease prevention using stem cells.                                                                                | CO5       |
| <b>Q3</b> | (20marks)                                                                                                                                                                                                                                       |           |
| (a)       | Give the registration procedure for trademark. On what grounds a trademark is said to be infringed.                                                                                                                                             | CO2 & CO1 |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (b)       | <i>"Multilateral trade agreements that aimed to reduce trade barriers and tariffs, and eliminate quotas"</i> Explain such agreement by highlighting its pros and cons.                                                                          |           |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (c)       | Give the sections that covers the patentable and non-patentable subject matters.                                                                                                                                                                |           |
| <b>Q4</b> | (20marks)                                                                                                                                                                                                                                       |           |
| (a)       | Describe the salient features of TRIPS.                                                                                                                                                                                                         | CO2 & CO1 |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (b)       | Highlight the role of traditional knowledge with relevance to biotechnology.                                                                                                                                                                    |           |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (c)       | Give the purpose of sui-generic system. How it works? Support your answer with relevant examples.                                                                                                                                               | CO1       |
| <b>Q5</b> | (20marks)                                                                                                                                                                                                                                       |           |
| (a)       | Explain the purpose for the enactment of Plant Protection Variety Farmers Act 2000. Give the reasons for the farmers to register plant varieties.                                                                                               | CO1 & CO2 |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (b)       | Differentiate between Injunction & Monetary Damages.                                                                                                                                                                                            |           |
|           | <b>OR</b>                                                                                                                                                                                                                                       |           |
| (c)       | Present any one study which reveals the infringement of trade-secret.                                                                                                                                                                           |           |
