

Roll No.

TEE-701

**B. TECH. (EEE) (SEVENTH SEMESTER)
MID SEMESTER EXAMINATION, Oct., 2022**

ELECTRICAL DRIVES

Time : 1½ Hours

Maximum Marks : 50

Note : (i) All questions are compulsory.

(ii) Answer any *one* sub-questions among (a) and (b) in each main question.

(iii) Each question carries 10 marks.

1. (a) Draw block diagram of an electrical drive and explain. (CO1)

OR

(b) Discuss the dynamic equation of electrical drive. (CO1)

2. (a) Draw and explain four quadrant operations of hoist. (CO3)

OR

(b) Why flywheel is employed for equalization of load derive the relation ? (CO3)

3. (a) Draw and explain the circuit diagram for armature resistance control of separately excited d.c. motor. What are its limitations ? (CO2)

OR

(b) With the help of suitable diagram, explain field control method to control the speed of d.c. series motor. (CO2)

P. T. O.

(2)

4. (a) Discuss regenerative and dynamic braking. What are the drawbacks of dynamic braking ? (CO3)

OR

- (b) Discuss steady state stability limit. How is it used to decide stability of the system ? (CO3)
5. (a) Enumerate various types of load characteristics. (CO2)

OR

- (b) How is plugging applied on motor ? Draw the circuit diagram and explain. (CO2)
