End Semester Examination June 2025

Name of the Course: B.Tech (CSE)

Semester: 8th

Name of the Paper: PROJECT
MANAGEMENT

Paper Code: TOE 802

Time: 3 Hours

Maximum Marks: 100

Note: -

- (i) All questions are compulsory.
- (ii) Answer any two sub questions among a, b & c in each main question
- (iii) Total marks in each main question are twenty.
- (iv) Each question carries 10 marks

Q1	(20 marks)	
(a)	Explain the primary objectives of Software Project Management (SPM), and how do they align with overall business goals?	CO1
(b)	Discuss the role of a project manager, and what skills are essential for effective project leadership?	
(c)	Illustrate the methods that can be employed for need identification in project management, and why is this step critical?	
Q2	(20 marks)	
(a)	Outline the primary objectives of software project planning, and why are they critical for project success?	CO2
(b)	Describe the Work Breakdown Structure (WBS), and how does it facilitate project planning and management?	
(c)	Explain the use of network diagrams such as PERT and CPM in project scheduling. How do these tools assist in managing project timelines?	
Q3	(20 marks)	
(a)	List out the key dimensions of project monitoring and control, and how do they contribute to project success?	CO3
(b)	Compare and contrast inspections, desk checks, walkthroughs, code reviews in terms of their processes and benefits.	
(c)	Discuss Schedule Variance (SV) and its importance in evaluating project timelines.	
Q4	(20 marks)	
(a)	Elaborate the main activities involved in Software Quality Assurance (SQA), and how do they contribute to overall software quality?	CO4
(b)	Discuss the different levels of testing, and how do they contribute to the overall quality of the software?	
(c)	Explain the SEI Capability Maturity Model (CMM), and how does it help organizations improve their software development processes?	
Q5	(20 marks)	
(a)	Define baselines in the context of software configuration management. Why are they important for project tracking?	CO5, CO6
(b)	Discuss the importance of version control in software configuration management. What are common practices and tools used?	
(c)	Identify and describe different types of risks in software projects. How can understanding these risks improve project outcomes?
